

I want to express my sincere thanks to NFOG granting support to develop the Prospective, International Multicenter study MoMaTEC (Molecular Markers in Treatment of Endometrial Cancer, <http://www.clinicaltrials.gov/ct2/show/NCT00598845>).

Specifically, the funding was given to develop the collaboration with Sahlgrenska and Dr. Janusz Marcickiewicz in a study of Molecular Markers in Endometrial carcinomas.

The study developed very well, but was funded elsewhere, so we did not need the support from NFOG.

The study is listed on NSGO web site (<http://www.nsgo.org/>) and the latest newsletter is also attached.

Bergen, December 14th 2009,

Sincerely yours, Helga B Salvesen
Professor
Haukeland University Hospital, Bergen, Norway

MULTICENTERSTUDY

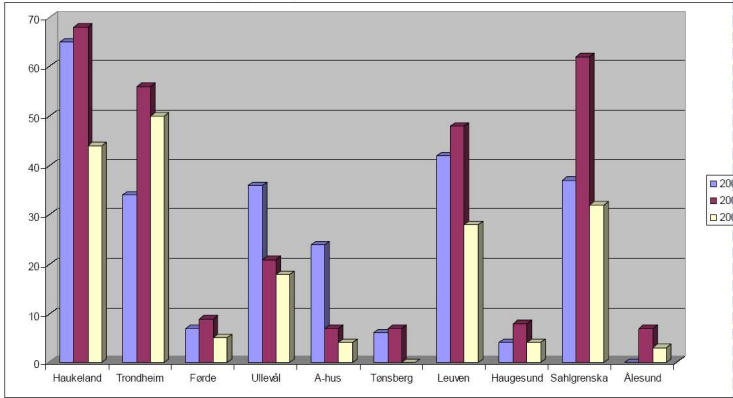

Prospective study of endometrial cancer treatment in relation to molecular markers in curettage specimens

We are doing fine!

10 different institutions have included a total of 736 patients since we started in 2007. THANKS TO EVERYONE!

One abstract presenting some of the data, presented by Jone at the ESGO meeting in Beograd is also enclosed.

Number of included cases per year by Institution:

Institution	2007	2008	2009
Haukeland	65	68	45
Trondheim	35	58	52
Forde	8	10	6
Ullevål	38	22	18
A-hus	25	8	5
Tonsberg	7	8	0
Leuven	42	48	28
Haugesund	5	9	5
Sahlgrenska	38	62	32
Ålesund	0	8	4

Have a very nice Christmas!
