

Course: Advanced course in gynecological ultrasound (Approved by the International Society of Ultrasound in Obstetrics and Gynecology)

Time: 16th – 19th November, 2009

Course leader: Lil Valentin
Povilas Sladkevicius

Aim: After the course, the participants will know how gynecological ultrasound examination can be used to optimize clinical management of gynecological patients with a variety of pathological conditions

Conditions: Participants should have basic knowledge of ultrasound technique and practical experience of gynecological scanning

Place: Small aula, MFC, entrance 59, Malmö University Hospital, Malmö, Sweden

Programme: Lectures, abundant image material, interactive sessions with case presentations. The lectures include ultrasound physics, ultrasound examination technique, optimization of the image, ultrasound based management of bleeding and pain in early pregnancy, i.e., miscarriage and ectopic pregnancies, ultrasound diagnosis of adnexal masses, uterine malformations, deep infiltrating endometriosis, extragenital pelvic pathology, the role of ultrasound in the management of bleeding disturbance, pelvic pain, and infertility, screening for ovarian cancer, ultrasound safety, and more..

Price: 7500 SEK (VAT not included) (invoice sent after registration)
